## **Energy Optimization Rebate Program Special Business Incentive**

This incentive allows each business customer, to replace up to ten ballasts and equivalent light bulbs, with new more energy efficient lighting, each year. This can be changing out T12's, T8's, or T5's to LED's.

We will pay for the ten ballasts, the light bulbs required for those ten ballasts, and labor/installation for those ten. If you do the installation yourself, we will not be able to pay you but if you hire a licensed contractor, we will pay for their time.

Receipts must be dated for the current year, in order for us to reimburse you. Or, you can have your contractor send the current year, bill directly to us and we will pay the contractor, for the work.

You can do ten this year and ten next year with this program. If have any questions, please give us a call. We will be happy to assist you.
